STOP AQUATIC HITCHHIKERS!

CLEAN AND DRY ANYTHING THAT COMES INTO CONTACT WITH WATER

Invasive aquatic plants, such as hydrilla and giant salvinia; exotic mussels, such as zebra and quagga mussels; and even algae, like didymo or rock snot, can hitch a ride on fishing and boating gear. Once established, they cause extensive damage to aquatic systems.

We need your help to prevent the spread of nuisance species.

When you leave a body of water:

• Remove any visible mud, plants, fish or animals before transporting equipment.
• Eliminate water from equipment before transporting.
• Clean and dry anything that comes into contact with water (boats, trailers, equipment, clothing, dogs, etc.).
• Never release plants, fish or animals into a body of water unless they came out of that body of water.

For more information, including recommendations for cleaning anything that comes into contact with water, visit: www.ProtectYourWaters.net
