

Green Growth Toolbox Workshop, hosted by the Winston-Salem/Forsyth C

Start Date: 10/10/2018 9:00 AM

End Date: 10/10/2018 4:00 PM

The Green Growth Toolbox (www.ncwildlife.org/greengrowth) was developed by the N.C. Wildlife Resources Commission and is a non-regulatory technical assistance program for communities interested in conserving wildlife habitats and natural resources through land use planning methods. This type of proactive planning secures benefits for our communities, the future of our wildlife and economy, helps to protect working farms and forests, and helps to ensure that development permit requirements are met ahead of time.

The NC Natural Heritage Program Data Explorer (www.ncnhde.natureserve.org/) is the state's most comprehensive database of natural resource information available. It combines on-the-ground surveys with advanced GPS and GIS technology. The NC Natural Heritage Program staff will provide training on how to use the Data Explorer for development review.

Participants will be eligible for American Planning Association and American Society of Landscape Architects continuing education credits. All participants will receive a free Green Growth Handbook that details priority wildlife habitats and access to the NHP Data Explorer.
