The Virtual Fly-tying Program provides tyers with an opportunity to increase their skills from the comfort of their home. Open to fly-tiers of all skill levels, the fly patterns change with each session as a way to encourage learning various tying techniques and development of tying skills. This session we will be tying the "Black Peacock Spider" and the "Leisenring Spider", both of these are low profile, soft hackle patterns that create movement in the water. These patterns work well on both trout and panfish. Participants registered for this program will be responsible for supplying their own materials. Below are the materials for each pattern:
