

# **Fishing Coastal Waters for Shad (Virtual) February 3rd, 2022**

**Start Date: 2/3/2022 6:30 PM**

**End Date: 2/3/2022 8:00 PM**

The American and hickory shad provide a fun springtime fishing opportunity along our coastal rivers. Be prepared for a fight as we examine the life cycles, migration patterns, and techniques for targeting these intense fighters with Captain Will Paul of the Tar River Company.

Captain Paul draws upon his experience gained by targeting warmwater and migratory fish species while growing up in Eastern North Carolina and as a fly-fishing Instructor with Orvis.

Paul will provide information for selecting and setting-up both conventional and fly-fishing equipment. Also, he will cover topics such as understanding water flows and temperatures, locating fish from the boat and river bank, and the importance of catch-and-release.
