

Electronic CDMAP Harvest Reporting Options

The Community Deer Management Assistance Program (CDMAP) has 2 electronic reporting options for hunters to register their harvests which been validated with a special “DMAP” tag. Hunters can register their harvests either by the phone or internet compatible device. Both options will require the successful hunters to provide their WRC Customer number (7-digit license number) and the DMAP tag number (5-digit tag number printed on the special adhesive tag, below). Note that tag numbers can be registered only once.

As a supplementary note, if a harvest occurs during the standard deer season, participants always have the option to use their Big Game Harvest Report Card or the special “DMAP” tag when validating a harvest.

Phone Reporting Option for DMAP tags

- This option allows successful hunters to register via the telephone using the standard NCWRC big game reporting telephone number: **1-800-I-GOT-ONE (1-800-446-8663)**.
 1. At the beginning of the call, hunters will be prompted to enter the type of tag being reported (e.g. Harvest ID from “Big Game Harvest Report Card” or DMAP tag). Hunters choosing to use the special adhesive DMAP tag should select option number “**2**”.
 2. Hunters will then be prompted for their **WRC Customer Number (7-digit number found at the top of your license)** and **DMAP tag number (5-digit number printed on adhesive tag which should be attached to the deer)**. Both customer and DMAP tag numbers will be confirmed and validated by the system.
 3. Hunters will then be prompted to answer a series of harvest questions throughout the remainder of the call. An authorization number will be given at the end of the call and should be retained by the hunter to legally possess the harvest.

Internet Compatible Device Reporting for DMAP tags

- This option allows successful hunters to register their harvests online via a computer or mobile device using the standard big game reporting link (www.ncwildlife.org/IGotOne) found on the Wildlife Resources Homepage (www.ncwildlife.org).
1. On the first screen, hunters will be prompted for their WRC Customer number (7-digit number found at the top of your license) and last name.

North Carolina Wildlife Resources Commission

Big Game Reporting

Please enter your WRC Customer Number and your last name below.

NOTE: Make sure to NOT add a suffix (such as Jr. or III) after your last name. Commas and periods should also be excluded. You can call 1-800-I-GOT-ONE (1-800-446-8663) to report your harvest if you are experiencing problems with the online system.

If you have issues reporting your Big Game Harvest, please email us at biggameregistration@ncwildlife.org.

2. Hunters choosing to use the special adhesive DMAP tag should select the bottom option (“**Report DMAP tag**”) from the drop-down list AND enter the full 5-digit number found on the adhesive DMAP tag. (Enter all zeroes as seen on the tag.)

North Carolina Wildlife Resources Commission

Big Game Reporting

Please enter ALL fields before pressing REPORT HARVEST to add the record. If your county is not displayed, refer to your [Regulations Digest](#) for valid season dates for each region.

The Harvest ID Number is the 9 digit tag number located on your Big Game Harvest Report Card below the authorization line next to each animal tag name.

Harvest ID Number or DMAP Tag?
 DMAP tags are issued to participants in the NCWRC Deer Management Assistance Program only. These tags are valid for antlerless deer only. More information about the program can be found at <http://www.ncwildlife.org/Learning/Species/Mammals/WhitetailDeer.aspx>.

DMAP Tag Number?
 Enter the full number as seen on the adhesive tag that should be attached to your deer. These tags can only be registered once.

JOHN DOE
Listed below are your reported big game harvests since the fall of year 2001. Use the Select button to choose which certificate you wish to print.
No reports with that ID were found in the database!

If you have issues reporting your Big Game Harvest, please email us at biggameregistration@ncwildlife.org.

3. Hunters will then be prompted to answer a series of harvest questions. An authorization number will be given at the end of the transaction and should be retained by the hunter to legally possess the harvest.
