

OBTAINING SERVICE

October 2014 - September 2015

Beaver Management Assistance Program

Since the first successful reintroduction of beaver into North Carolina in 1939, populations in the state have increased dramatically. Along with this population expansion has come an increase in benefits derived from beaver (for example, increased wetland habitat for a variety of plant and animal species, reduced downstream sedimentation, and improved water quality). However, detrimental impacts of beaver have also increased. For example, in 2014 landholders in eastern North Carolina reported that beaver damage to roads, agriculture and timber lands, drainage systems, landscape plantings, and other property exceeded \$6.8 million. In 2013-14 the North Carolina Department of Transportation (DOT) spent over \$1 million to repair roads damaged by beaver activities.

To address some of these problems, the North Carolina legislature in 1992 created the Beaver Damage Control Advisory Board with the charge to develop, implement, and oversee a program to manage beaver damage on public and private lands. The nine-member Advisory Board, composed of representatives from state and federal agencies and the private sector, established the Beaver

Management Assistance Program (BMAP). A major goal of the BMAP is to educate the public and participating landholders about the best strategies for managing beaver damage including the pros and cons of removing beaver or using pond levelers, exclusion, or other non-lethal techniques. Wildlife specialists conduct programs and workshops on beaver damage management and beaver ecology for civic and professional organizations, schools, landholder groups, and others. When beaver damage is intolerable, wildlife specialists alleviate the damage by removing the offending animals and their dams using humane and environmentally acceptable methods or by using pond levelers, exclusion, or other non-lethal techniques.

Customers

The BMAP assists the DOT, city and county governments, soil and water conservation districts, private landholders, and others with beaver

problems. The program is run by USDA Wildlife Services through a cooperative agreement with the North Carolina Wildlife Resources Commission. Funding comes from state, county, federal, and private sources.

How to Participate

All counties are eligible to participate in the program through an annual cost share assessment of \$4,000 per county. Presently, 44 counties participate in the program. Individuals residing in these counties may obtain assistance with beaver damage by contacting their county Cooperative Extension or Soil and Water Conservation District office (listed on the back of this page). Statewide assistance with beaver damage problems is also provided to the DOT. All requests for assistance receive an immediate response, but due to current workloads the start of direct assistance activities may vary.

PARTICIPATING COUNTIES

1993-2015

Cost Share

Participants in the program pay a small cost-share fee for services. This cost-share fee is \$20 for each visit to their property. There are no charges for travel time. There is also a \$125 charge for dam removal. Wildlife specialists average about 10 visits over a 30-day period to resolve a beaver problem. After 15 visits to a landholder's property in any one year, costs increase. There is no charge for the initial assessment which includes time spent discussing the program and signing paperwork. During this assessment the wildlife specialist discusses with the landholder the positive and negative impacts of beaver and recommends the best course of action. If damage management activities are recommended, time and costs are estimated and the wildlife specialist begins work. Landholders wishing to conduct their own work are provided individualized training at no cost.

Assistance Priorities

Requests for assistance are handled on a first-come, first-served basis with top priority addressing threats to public health and safety, particularly along highway rights-of-way and county-owned property. Work for individual landholders is next, followed by work for soil and water conservation districts, municipalities, corporate landholders, and others.

Additional Information

For additional information about the Beaver Management Assistance Program, please call or write the USDA Wildlife Services at 6213-E Angus Drive, Raleigh, NC 27617, tel. 866-487-3297, or the NC Wildlife Resources Commission, Division of Wildlife Management at 1751 Varsity Drive, Raleigh, NC 27606, tel. 919-707-0050.

In FY 2014 BMAP activities prevented the loss of, or damage to, \$6.8 million in resources; \$6.31 saved for each \$1.00 spent.
