15A NCAC 10B .0106 WILDLIFE TAKEN FOR DEPREDACTIONS

(a) Depredation permits shall authorize the taking, destruction, transfer, removal, transplanting, or driving away of undesirable, destructive, or excess wildlife or wildlife resources as specified in Paragraph (d) of this Rule.

(b) The following conditions shall apply to depredation permits:

- (1) depredation permits shall be prepared on a form supplied by the Commission; and
- (2) depredation permits shall only be issued by authorized employees of the Commission or licensed Wildlife Control Agents (WCA).

(c) Depredation permits shall not be required for the owner or lessee of a property to take wildlife while committing depredations on that property; however, the manner of take, disposition of dead wildlife, and reporting requirements specified in this Rule shall apply.

(d) No permit shall be issued to take endangered or threatened species of wildlife listed under 15A NCAC 10I, except alligators, by reason of depredations to property. The Executive Director or his or her designee may issue depredation permits for Special Concern species listed in 15A NCAC 10I .0105 and for alligators. An individual may take an endangered or threatened species in immediate defense of his or her own life or of the lives of others without a permit. Any endangered or threatened species that may constitute a demonstrable but non-immediate threat to human safety shall be reported to a federal or Commission wildlife enforcement officer, who, upon verification of the report, may take or remove the specimen as provided by 15A NCAC 10I .0102. Depredation permits for other species may be issued under the following conditions:

- (1) for taking wildlife that is or has been damaging or destroying property, provided there is evidence of property damage. No permit may be issued for the taking of migratory birds and other federally-protected animals unless a corresponding, valid U.S. Fish and Wildlife Service depredation permit(s), if required, has been issued. A permit issued pursuant to this Rule shall name the species allowed to be taken and may include limitations as to age, sex, type of depredation, location of animal or damage, and local laws. The permit shall be issued to a landholder or an authorized representative of a unit of local government for depredations on public property. The permit shall be used only by individuals named on the permit.
- (2) for taking of wildlife resources in circumstances of overabundance or when the wildlife resources present a danger to human safety. Cities, as defined in G.S. 160A-1(2), seeking a depredation permit pursuant to these circumstances shall apply to the Commission using an application available from the Commission. The application shall include the following information:
 - (A) the name and location of the city;
 - (B) the acreage of the affected property;
 - (C) a map of the affected property;
 - (D) the signature of an authorized city representative;
 - (E) the nature of the overabundance or the threat to public safety; and
 - (F) a description of previous actions taken by the city to ameliorate the problem.

1 (e) Each depredation permit shall have an expiration. A depredation permit authorizes the possession of ~~any~~ wildlife
2 resources taken under the authority of the permit. Depredation permits shall be retained as long as the wildlife resource
3 is in the authorized individual's possession. Individuals taking wildlife resources under the authority of a depredation
4 permit shall comply with the conditions of the permit and the requirements specified in this Rule.

5 (f) Manner of Taking:

6 (1) Taking Without a Permit. Wildlife taken without a permit while committing depredations to
7 property may, during the open season on the species, be taken by the landholder by any lawful
8 method. During the closed season, such depredating wildlife may be taken without a permit only by
9 the use of firearms or archery equipment as defined in 15A NCAC 10B .0116.

10 (2) Taking With a Permit. Wildlife taken under a depredation permit may be taken only by the method
11 or methods authorized by the permit. When trapping is authorized, in order to limit the taking to the
12 intended purpose, the permit may specify a reasonable distance from the property sought to be
13 protected, within which the traps shall be set. The Executive Director, Commission employee, or
14 WCA may also state in a permit authorizing trapping whether or not bait or lure may be used and
15 the type of bait or lure that is authorized based upon factors such as type of depredation, locations
16 of animal or damage, and local laws. In addition to any trapping restrictions that may be contained
17 in the permit, the method of trapping shall be in accordance with the requirements and restrictions
18 imposed by G.S. 113-291.6 and other local laws passed by the General Assembly. No depredation
19 permit shall authorize the use of poisons or pesticides in taking wildlife except in accordance with
20 the provisions of the North Carolina Pesticide Law of 1971, G.S. 143, Article 52, the Structural Pest
21 Control Act of 1955, G.S. 106, Article 4C, and G.S. 113, Article 22A. No depredation permit shall
22 authorize the taking of wildlife by any method by any landholder upon the lands of another except
23 when the individual is listed as a second party on a depredation permit.

24 (3) Intentional Wounding. It is unlawful for any landholder, with or without a depredation permit, to
25 intentionally wound a wild animal in a manner so as not to cause its immediate death as suddenly
26 and humanely as the circumstances permit.

27 (g) Disposition of Wildlife Taken:

28 (1) Generally. Except as provided by Subparagraphs (2) through (5) of this Paragraph, any wildlife
29 killed without a permit while committing depredations shall be buried or disposed of in a safe and
30 sanitary manner on the property where taken. Wildlife killed under a depredation permit may be
31 transported to an alternate disposal site if desired. Anyone in possession of carcasses of animals
32 being transported under a depredation permit shall have the depredation permit in his or her
33 possession. Except as provided by Subparagraphs (2) through (5) of this Paragraph, all wildlife
34 killed under a depredation permit shall be buried or otherwise disposed of as stated on the permit.

35 (2) Deer and feral swine. The edible portions of feral swine and deer may be retained by the landholder
36 for consumption but shall not be transported from the property where the depredations took place
37 without a valid depredation permit. The landholder may give a second party the edible portions of

1 feral swine or deer taken under a depredation permit. The receiver of the edible portions shall hold
2 a copy of the depredation permit. The nonedible portions of any deer carcass, including head, hide,
3 feet, and antlers, shall be disposed of as specified in Subparagraph (1) of this Paragraph or turned
4 over to a wildlife enforcement officer for disposition.

5 (3) Fox. Any fox killed under a depredation permit may be disposed of as described in Subparagraph
6 (1) of this Paragraph or, upon compliance with the fur tagging requirements of 15A NCAC 10B
7 Section .0400, the carcass or pelt thereof may be sold to a licensed fur dealer.

8 (4) Furbearing Animals. The carcass or pelt of any furbearing animal killed during the open season for
9 taking such furbearing animal for control of depredations to property, whether with or without a
10 permit, may be sold to a licensed fur dealer provided that the person offering such carcass or pelt
11 for sale has a valid hunting or trapping license; provided further that bobcats and otters may only be
12 sold upon compliance with any required fur tagging requirement set forth in 15A NCAC 10B
13 Section .0400.

14 (5) Animals Taken Alive. Wild animals in the order Carnivora, armadillos, groundhogs, nutria, and
15 beaver shall be humanely euthanized either at the site of capture or at a facility designed to humanely
16 handle the euthanasia, or such wild animals must be released on the property where captured. Feral
17 swine shall be euthanized while still in the trap in accordance with G.S. 113-291.12. For all other
18 animals taken alive, the animal shall be euthanized or released on property with permission of the
19 landowner. When the relocation site is public property, written permission shall be obtained from
20 the local, State, or federal official authorized to manage the property before any animal may be
21 released. Animals transported or held for euthanasia shall be euthanized within 12 hours of
22 possession. Anyone in possession of live animals being transported for relocation or euthanasia
23 under a depredation permit shall have the depredation permit in his or her possession.

24 (h) Reporting Requirements. Any landholder who kills an alligator; coyote in the counties of Beaufort, Dare, Hyde,
25 Tyrrell, or Washington; deer; Canada goose; bear; elk; or wild turkey under a valid depredation permit shall
26 report the kill on the form provided with the permit, including the number and species of animal(s) killed,
27 and submit the form upon the expiration date of the depredation permit to the Commission. Any landowner
28 who kills a coyote in the counties of Beaufort, Dare, Hyde, Tyrrell, and Washington shall report the kill,
29 including the number of coyotes killed, on the form provided with the depredation permit. The killing and
30 method of disposition of every alligator; coyote in the counties of Beaufort, Dare, Hyde, Tyrrell, and
31 Washington; bear; or elk taken without a permit shall be reported to the Wildlife Resources Commission
32 within 24 hours following the time of such killing.

33 (i) Exemption for Animal Control Officers. Animal Control Officers, as defined by G.S. 130A-184(1) when in the
34 performance of official duties, shall be exempt from obtaining a depredation permit when taking wild animals that:

- 35 (1) exhibit visible signs of rabies;
36 (2) exhibit unprovoked aggression that may be associated with rabies;
37 (3) are suspected to be rabid; or

1 (4) have or may have exposed humans, pets, or livestock to rabies.
